CLARKE DUST EXTRACTOR KIT

Model: CDE Kit
Part No: 6470312

The dust extractor kit consists of two parts and can be used with either the CDE7B or the CDE35B

1. Hose 2.5metres (94") Long X 102mm (4") ID.
2. Adapter/ 2" Reducer.

NOTE:

These two items are used separately, they are NOT intended to be used together.

Both items fit directly onto the safety adapter already fitted to the dust extractor inlet cover. NEVER remove this adapter, as this is a safety requirement.

The safety adapter is only required to be removed for maintenance purposes, and then, ALWAYS refer to the relevant dust extractor manual.

The hose is fitted directly onto the safety adapter and secured in place using one of the wire clips supplied, the second clip is used to secure the other end of the hose to the equipment/machine, (DO NOT overtighten clips).

The Adapter/2" Reducer simply pushes onto the safety adapter and requires no fixing. The adapter is intended to enable direct connection to the dust output port on hand power tools, i.e routers, planes etc, using a suitable length of 2" flexible hose (not supplied).
